

# Student Questionnaire

## 15-883 Fall 2013: Computational Models of Neural Systems

David S. Touretzky

### Contact Information:

Name:

Home phone:

Dept./University:

Work phone:

Year (junior, grad, postdoc, etc.):

Email address:

Registration (circle all that apply): **course credit**    **core unit credit**    **audit** (no credit)

### Neuroscience Background:

Please briefly describe your background in neuroscience, e.g., "no previous exposure", "have done reading on my own, such as ...", "have taken the following CNBC core courses," "am a doctoral student in neuroscience," etc.

### Computational Background:

Please briefly describe your computational background: (1) level of programming experience, (2) courses in AI, cognitive science, or neural networks you have taken.

### Matlab Experience:

Have you used Matlab before?

### Research Interests:

What are you currently working on? Are there any aspects of computational neuroscience that are of particular interest to you, e.g., development of the visual system, neural basis of memory, etc.?

### Other Comments?
