Write the letter all of the statements that are **true** about the simulation code to the right:

At the start, the simulation shows:
A. **a circle on top of a square**
B. a square on top of a circle
C. a circle and square side-by-side

When the '-' key is pressed:
D. the circle gets smaller
E. **the circle gets larger**
F. the circle moves up
G. the circle moves down

When the '+' key is pressed:
H. the square moves left
I. the square moves right
J. **the square moves up**
K. the square moves down

```python
def makeModel(data):
    data["cr"] = 50
    data["sy"] = 200

def makeView(data, canvas):
    sy = data["sy"]
    cr = data["cr"]
    canvas.create_rectangle(200-50, sy-50,
                            200+50, sy+50, fill="red")
    canvas.create_oval(200-cr, 200-cr,
                       200+cr, 200+cr, fill="blue")

def keyPressed(data, event):
    if event.char == "-":
        data["cr"] += 10
    if event.char == "+":
        data["sy"] -= 10
```
