

Andrew ID: _____

1. Draw the layout of the object created at the end of this code. Show all virtual function tables.

```
interface Pingable {
    public void ping();
}
class Counter implements Pingable {
    int count = 0;
    public void ping() {
        ++count;
    }
    public int val() {
        return count;
    }
}
Counter c = new Counter();
```
