Research

- Directed Storytelling to understand what people do with images
- Lots of overlap, but four consistent high-level concepts:
 - Taking the pictures
 - Collecting them
 - Editing & Storing them
 - Enjoying & Sharing with others

Process

- Thought of various representations:
 - Spider - Too focused.
 - Linear Process - Still missing something.
 - Circular Process - The data showed a cycle.
 - Experimented with combining our ideas, but it ended up being too complex.

The Journey of a Digital Image
