**Abstract:** We describe the formatting requirements for ITS 2006 workshop papers publications. We ask that authors follow some simple guidelines. The easiest way to do this is simply to edit your paper with this template and replace the content with your own text and graphics.

**Keywords:** ITS 2006, intelligent tutoring system, workshops

## PAGE SIZE

All material on each page should be centered on an A4 (8.26 x 11.69 inch) page with 2.5cm (or 1 inch) margins all around. It is important to check these margins even if you use this Word template, because they might have been overwritten by your local settings.

## FORMATTED TEXT

Carefully format your submission using the following styles: Title and Authors The title (Helvetica 18-point bold), authors' names (Times New Roman 12-point bold) and affiliations (Times New Roman 12-point not-bold) run across the full width of the page. We also recommend that you add your e-mail address using the affiliations style.

## ABSTRACT AND KEYWORDS

Place two blank Normal (10 pt.) lines after the title, followed by an abstract of about 100 words. The abstract should begin with the word Abstract. in bold, and should be formatted in the Abstract style provided in this template (like Normal, but indented 1cm each side). The abstract should be a concise statement of the problem, approach, findings, and conclusions of the work described.

Place one blank Normal line after the abstract, followed by the word Keywords. in bold, followed by a set of keywords, this being also formatted in Abstract style. The keywords should be chosen to be suitable for both an index of the proceedings and for electronic search.

One Normal line should follow the keywords before the first section header of your paper.

## BODY TEXT

Format the first paragraph of each section (following the section title) in the style Body Text, like this paragraph. Please use a 10-point Times New Roman font, or other Roman font with serifs, as close as possible in appearance to Times New Roman in which these guidelines have been set. The goal is to have a 10-point text, as you see here. Please use sans-serif or non-proportional fonts only for special purposes, such as distinguishing source code text (use 9 point Courier or similar). The Press 10-point font available to users of Script is a good substitute for Times New Roman. If Times New Roman is not available, try Times or Computer Modern Roman.

Format all remaining paragraphs of your paper in the style Body Text First Indent, like this paragraph. This style is like Body Text, but the first line is indented 0.5cm.

## LISTS

For lists make use of the 3 standard Latex list styles itemize, enumerate, and description. They are accessed by the standard commands shown in the examples below. Sublists are handled by the standard nesting commands.

- The Itemize list.
- The command is:

```
\begin{itemize}
  \item The Itemize List
\end{itemize}
```

1. The enumerate list.
2. The command is:

```
\begin{enumerate}
  \item The enumerate List
\end{enumerate}
```

**Description** The Description list.

**Command** The command is:

```
\begin{description} ...
  \item[Description] The Description list. ...
\end{description}
```

## REFERENCES AND CITATIONS

Use the standard APA (American Psychological Association) format for references References should be published materials accessible to the public. Internal technical reports may be cited only if they are easily accessible (i.e., you give an Internet address within your citation). Proprietary information may not be cited. Private communications should be acknowledged, not referenced, e.g., (Robertson, personal communication). Page Numbering, Headers and Footers Do NOT include headers, footers or page numbers in your submission. These will be added when the publications are assembled.

Example citations are: [Bex et al., 2003] and [Cohen, 1987].

## SECTIONS

The heading of a section should be in Helvetica 12-point bold in all-capitals. Sections should NOT be numbered. Provide 12 points space before the heading and 6 space points after.

### 7.1 Subsections

The heading of subsections should be in Helvetica 10-point bold with only the initial letters capitalized. Provide 12 points space before and 6 points after the heading.

#### 7.1.1 Sub-subsections

The heading for sub-subsections should be in Helvetica 10-point italic with initial letters capitalized. Provide 6 points space before the heading and no space after.

## FIGURES AND TABLES

Figures and tables should be inserted at the appropriate point in your text. Each figure and table should have a figure caption in Normal Times New Roman 10 point font.

## ADDITIONAL AUTHORS

**Addauth Number One** Some student somewhere.       *spam-me@hotmail.com*
