- ssh into andrew
- vim .vimrc
- Examine contents
- Notice that we have already provided some customization here.
-

ZSH

The last shell you need.

New Features

oh-my-zsh

Literally THE BEST thing

Better Globs

Better globbing features
Check this out.

Spelling Correction

Allow minor directory name mistakes

Tab Completion

Better tab completion you can arrow between

Path Autocompletion

`/u/lo/b -> /usr/local/bin`

Install zsh: here

Run: `chsh -s $(which zsh)`

oh-my-zsh

1. Install zsh
   - Follow instructions here for your OS
2. Install oh-my-zsh
   - `sh -c "$(curl -fsSL https://raw.githubusercontent.com/ohmyzsh/ohmyzsh/master/tools/install.sh)"`
3. Look at the config file!
   - `vim ~/.zshrc`
   - Take a look at some themes or plugins

Most Popular Themes

powerlevel10k

spaceship

pure

Theme

- A nice theme makes all the difference -- of course, this is super subjective
- My favorite theme is powerlevel10k
  - Install fonts as described here
  - `git clone --depth=1 https://github.com/romkatv/powerlevel10k.git ${ZSH_CUSTOM:-$HOME/.oh-my-zsh/custom}/themes/powerlevel10k`
  - Set `ZSH_THEME="powerlevel10k/powerlevel10k"` in your `~/.zshrc`

Plugins

1. **git**
   Super useful git shortcuts i.e.
   `gcam = git commit -a -m`
   with documentation here

2. **zsh-autosuggestions**
   Suggest potential completion of current command with install instructions here

3. **fasd**
   Easily jump around directories with “fuzzy search”, install instructions here

4. **zsh-syntax-highlighting**
   Syntax highlighting for zsh shell commands, with install instructions here

5. **colored-man-pages**
   Colorize man pages for easier visualization

6. **Tons More**
   A nice list of more plugins
