

[15-112] Lecture 8

Piazza post on not using lists!

Am I **only** using split and splitlines in a for loop to loop over strings? No, then probably using list functions.

```
def onStart(app):
    resetApp(app)

def resetApp(app):
    app.color = "red"

def redrawAll(app):
    drawShape(app)

def drawShape(app):
    drawRect(0, 0, 10, 10,
            fill=app.color)

runApp()
```

Lecture 8 Poll 1

Is resetApp part of the model, view, or controller?

- A. Model
- B. View
- C. Controller
- D. None of the above
- E. I don't know

```
def onStart(app):
    resetApp(app)

def resetApp(app):
    app.color = "red"

def redrawAll(app):
    drawShape(app)

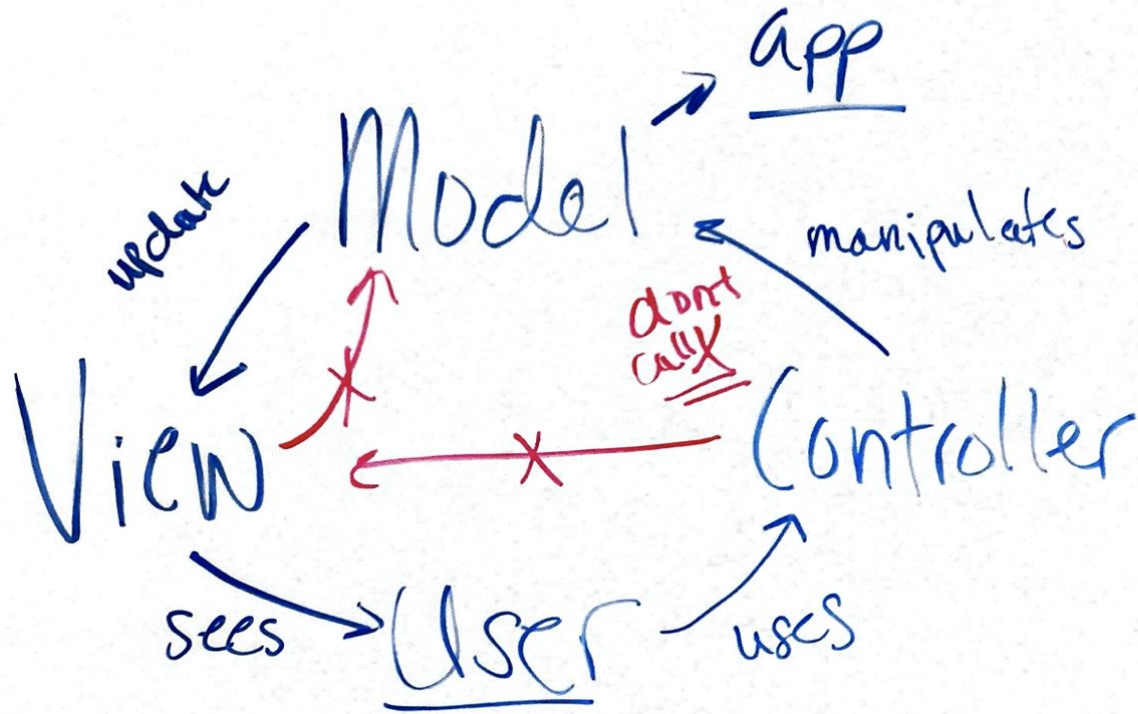

def drawShape(app):
    drawRect(0, 0, 10, 10,
            fill=app.color)

runApp()
```

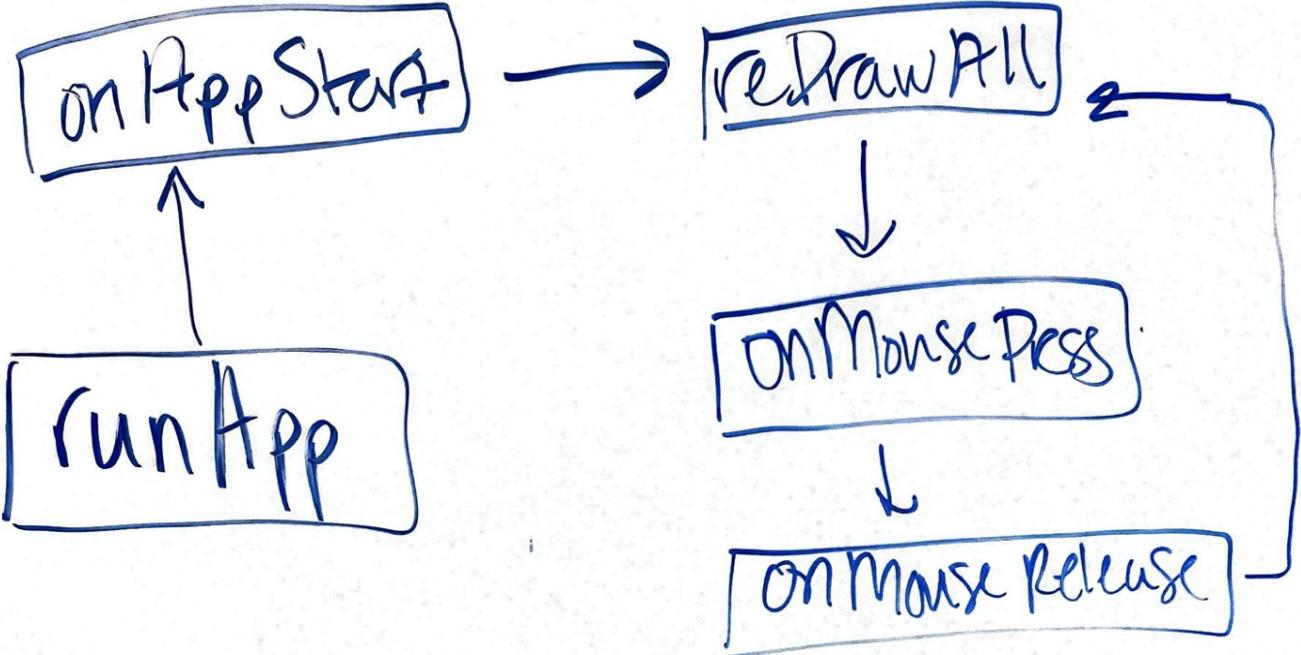

Lecture 8 Poll 2

Is drawShape part of the model, view, or controller?

- A. Model
- B. View
- C. Controller
- D. None of the above
- E. I don't know

misspelled: should be **redrawAll** not **reDrawAll**

not redraw All
