# 15-853 Project Report Outline

---

## Group Members

## Abstract

1 A very brief summary of your project.

## 2 1 Introduction

3 What is the motivation for your project? What are the main question you are interested in addressing?

4 **The page limit for the project report is five pages**, including figures. Additional pages are allowed  
5 for citations (no page limit), and appendices. However, we might not read the content of your  
6 appendix.

## 7 2 Background

8 This section should include technical preliminaries and background needed to understand your project,  
9 except for the material covered in class.

## 10 3 Related Work

11 This section should include discussion of papers related to your project. If you are doing a survey,  
12 this section can be split into several sections, as you see fit. For survey projects, the related work  
13 section(s) need to be a distillation of the works (compare and contrast) rather just summarizing each  
14 works independently.

## 15 4 New Results (If any)

16 For a research project, in case you don't have any new results, mention what all you tried even if it  
17 did not work out.

## 18 5 Conclusions

19 **5.1 What did you learn from this project?**

20 **5.2 How successful was the project (from your viewpoint)?**

## 21 References

22 Please cite all of your sources, including papers you read, ideas you relied on, and code bases you  
23 used.
