

## Power Point Assignment (27/01/99)

Prepare a Power Point show corresponding to a 10 to 15 minutes presentation of our solar system using the provided resources disk and optionally other resources available to you. The presentation should comply with the following requirements:

- ❖ The nine planets and the sun are presented
- ❖ A title slide and a slide of the presentation plan are provided at the beginning.
- ❖ A conclusion slide is appended at the end of the presentation
- ❖ Background and color scheme have been customized (do not simply use wizards or apply automatic models)
- ❖ Each slide has a title box enabling you to easily navigate in the list of the slides during a presentation.

### *Submit:*

Power Point presentation file (Format: PC, Windows 95 and Power Point 97, 3"5 floppy disk, virus free). Do not make the file too big, it must fit on one floppy disk. Plus optional hard copy hand-out and speakers notes.

*Pass:* The presentation meets the requirements and the result is obtained by the effective use of Power Point features.

### *Merit*

As for Pass, plus:

- The assignment handed in by the deadline date 27/01/99
- A handout has been generated
- Many more objects have been included (Asteroids, comets,...) using the given resources or personal resources
- The presentation is focused and punchy, there being between 3 and 5 main points or groupings used.

### *Distinction*

As for Merit, plus:

- Some speaker's notes are provided.
- Significant information or resources other than those given on the resources disk have been added
- Significant work on design and creativity.

Inc: Floppy disk containing text files (.txt), images files (.gif and .jpg) and video files (.mpg).

IF THE SUBMISSION DEADLINE IS NOT RESPECTED THE MAXIMUM GRADE IS "PASS"
